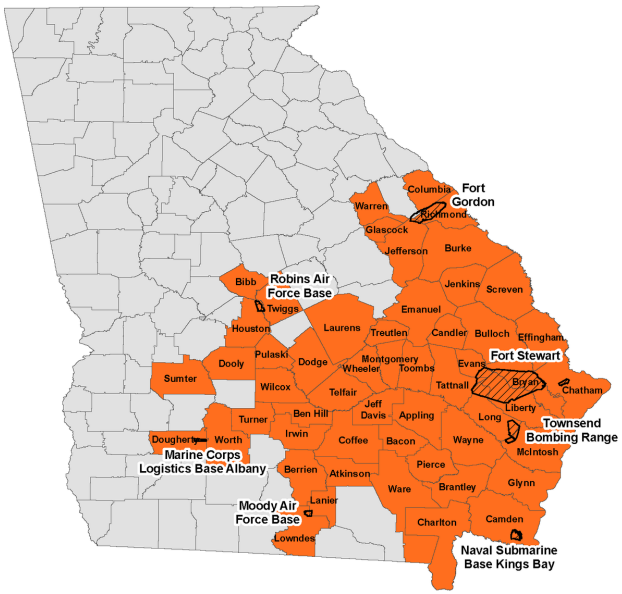
Georgia Sentinel Landscape Pilot Project

PRESCRIBED FIRE INITIATIVE

ABOUT

The Georgia Sentinel Landscape (GSL) Pilot Project is a collaboration between public and private stakeholders who have overlapping natural resource management goals in proximity with military installations. It aims to help landowners overcome challenges associated with effectively managing and enhancing their forestlands by providing technical and financial assistance as well as outreach programs. The GSL Prescribed Fire Initiative provides cost-share for prescribed burning, firebreaks, and prescribed burn plans to landowners in more than 50 counties with an emphasis on those near Fort Stewart and the Naval Submarine Base Kings Bay.



WHY SHOULD YOU BURN?

- Improve wildlife habitat
- Reduce wildfire risk
- Manage competing vegetation
- Control insects
- Recycle nutrients
- Enhance aesthetics

HOW IT WORKS

CONTACT

Call or email the project coordinator to discuss the initiative, your interest in utilizing prescribed fire as a land management tool, and set up a site visit.

SITE VISIT

The project coordinator will visit your property and discuss your natural resource management goals with you.

APPLY

The project coordinator will assist you with the application package which includes a landowner agreement, project map, and photos.

IMPLEMENT

If your application is funded, you will implement the prescribed fire practices.

REIMBURSEMENT

You will be reimbursed after the project coordinator visits the property to verify the work has been completed.
