

Virtual Longleaf Academy

Herbicides & Longleaf 201

Herbicides & Longleaf will provide participants with the tools to select forestry herbicides to meet their unique ecological restoration and longleaf management objectives.

Herbicides & Longleaf will guide participants through a range of topics:

- Herbicide application rates & timing;
- Surfactants and adjuvants;
- Application equipment;
- Site prep and release treatments;
- Practices to minimize impacts to longleaf pine & other desired species;
- Invasive species impacts;
- And topics of local significance.

SAF and SC Pesticide
credits pending approval
