

Virtual Longleaf Academy

Groundcover 201

Groundcover Restoration 201 will focus almost entirely on the “nuts and bolts” of restoration. Prior students of *Understory Diversity* will find that this academy offers the practical counterpart to the plant identification and ecology lessons learned in *U201*. Expert instruction will be provided by staff from The Longleaf Alliance and guest partners through a combination of on-demand and live learning, as well as interactive exercises.

Groundcover 201 will guide participants through a wide range of topics:

- ◆ Longleaf Pine Communities
- ◆ Determining Restoration Needs
- ◆ Seed Source Selection
- ◆ Plants for Longleaf Restoration
- ◆ Seed Collection
- ◆ Site Preparation
- ◆ Planting Methods
- ◆ Maintenance and Management

SAF Credits pending approval

“All things Groundcover”
