

# LEARN TO BURN

## FIELD DAY

### See a live prescribed burn demonstration!

The South Carolina Forestry Commission, in conjunction with natural resource organizations and other partners, will conduct a prescribed fire demonstration and training session Feb. 26 in Kingstree. The workshop is geared toward landowners with low to moderate burning experience, but all are welcome.

Participants will:

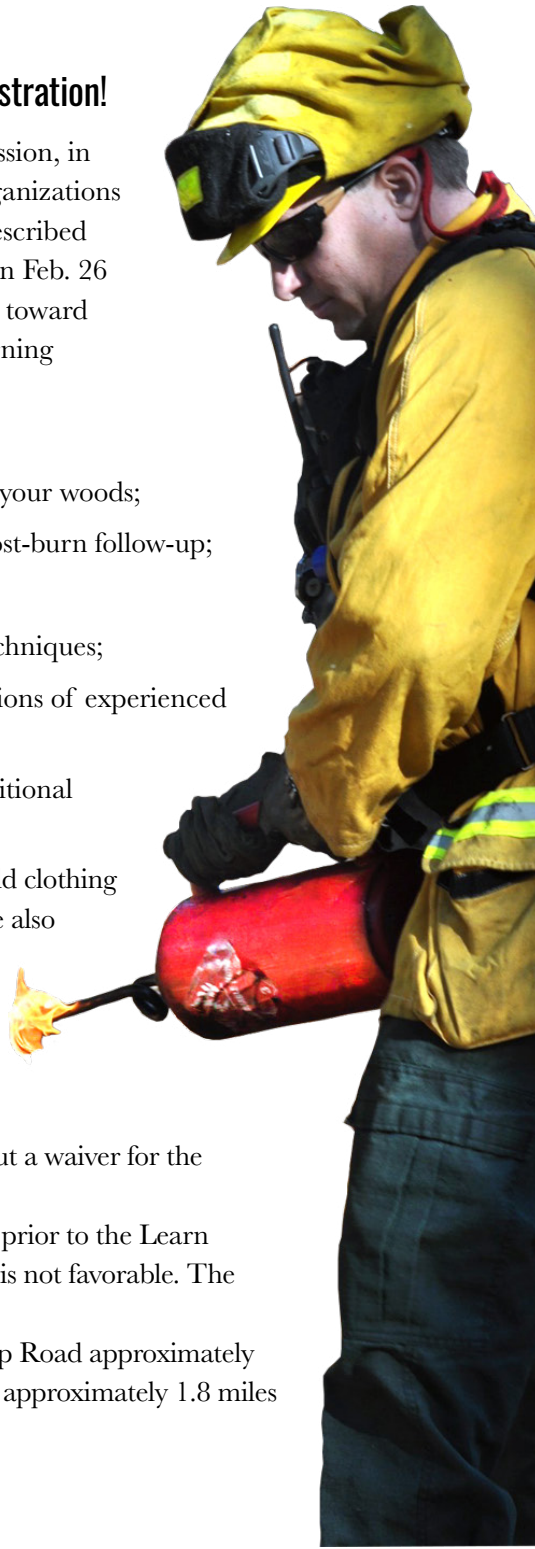

- learn why it is important to burn your woods;
- learn proper pre-planning and post-burn follow-up;
- discuss liability issues;
- view/discuss different burning techniques;
- have the opportunity to ask questions of experienced professionals;
- learn about opportunities for additional knowledge.

Attendees must wear non-synthetic field clothing and boots if they want to burn and are also encouraged to wear gloves and eye protection. Attendees should expect a variety of weather conditions, cold temperature and smoke.

\* All attendees will be asked to fill out a waiver for the workshop during registration.

\*\* Attendees will be notified one day prior to the Learn To Burn Field Day if the weather is not favorable. The alternate/rain date is March 4.

\*\*\* Look for signs along Boggy Swamp Road approximately 0.8 miles from Inglenook Road or approximately 1.8 miles from Cedar Swamp Road.
